End User License Agreement

BY INSTALLING, COPYING OR USING ALL OR ANY PORTION OF THIS SOFTWARE YOU ACCEPT ALL THE TERMS AND CONDITIONS OF THIS AGREEMENT.

This Sygic, s.r.o. End-User License Agreement ("EULA") is a legal agreement between you (either an individual or a single entity) and Sygic, s.r.o. for the Sygic, s.r.o. product known as Sygic Mobile Maps 2009 ("Software Product"). Use of third party materials or data may be subject to other terms and conditions. If you do not agree to terms of this EULA, do not install or use the Software Product; you may, however, return it to your place of purchase for a full refund.

You may have another written agreement directly with Sygic, s.r.o. (e.g., a volume license agreement) that supplements or supersedes all or portions of this agreement.

Sygic, s.r.o. grants you limited rights to use the Software Product (Sygic Mobile Maps 2009) in binary executable form available to you after the installation. Title, ownership rights and intellectual property rights in and to the Software Product remain in Sygic, s.r.o. The Software Product is owned by Sygic, s.r.o. or its suppliers and is protected by European Union copyright and patent laws and international treaty provisions.

THE SOFTWARE COPY IS LICENSED TO YOU, NOT SOLD TO YOU, AND YOU ARE NOT AN OWNER OF ANY COPY THEREOF.

You may install, use, access, display, run or otherwise interact with ("Run") one copy of the Software Product either on a single computer, handheld, Car PC, smart phone ("Computer") or on a single Secure Digital memory card. A license for the Software Product may NOT be shared or used concurrently on different Computers.

ALL RIGHTS NOT EXPLICITLY OR EXPRESSLY GRANTED IN THIS EULA ARE RESERVED BY Sygic, s.r.o.. THIS EULA DOES NOT GRANT YOU ANY RIGHTS IN CONNECTION WITH ANY TRADEMARKS OR SERVICE MARKS OF Sygic, s.r.o.. License for this Software Product is not for transfer, distribution, or disclosure to third parties or use for the benefit of third parties.

All title, and copyrights in and to the Software Product and to the content which may be accessed through use of it, the accompanying materials and any copies of the Software Product are owned by Sygic, s.r.o. and its suppliers. You may not decompile, disassemble, modify, reverse assemble, reverse engineer or reduce the Software Product of any part thereof or create any derivative works based on the Software except to the extent such activity is expressly permitted by applicable law notwithstanding this limitation.
In certain countries the use of flashpost / speedcamera information might be in conflict with the law and/or regulations. By using such information user agrees to indemnify Sygic and its 3rd party suppliers of any claims related to such flashpost / speedcamera information. Usage is at own risk.

I. Getting Started

Using the “Main screen”

To enter the **main menu**, touch the map area (A) on the main screen, or press the left button on non-touchscreen devices.

To enter the **quick menu**, touch the info panel (B), or right button on non-touchscreen devices.

If the menu contains more pages, you can show the next page using buttons at the bottom of the screen, or by pressing the right button on non-touchscreen devices.
Entering an Address

To navigate to your destination, enter **Main menu**, select ✨ Navigate to... icon and then choose 📬 Address.

Next, you will be asked to select **Country, City, Street** and **House number** or **Street crossing**.
After the destination is entered, the confirmation screen is displayed:

To confirm the selected destination, push the **Route Me!** button.

If your device knows your current position, your route will be calculated immediately. If your device does not have accurate position, you will get options, how to determine the starting point of the route:

- **Wait for valid signal** (Recommended)
  
  Your route will be calculated as soon as your current GPS position will be recognized. See the chapter [Acquiring GPS Position](#).

- **Last valid position**
  
  The starting point of your route will be your last position located by GPS (e.g. when you entered the building).

Here you can view the exact position on the map, add it to your list of favorite locations, find nearby parking place, or make a phone call.

Please note, that the **Call** button is available only if the map contains phone number of selected destination, and if the device supports GSM calls.
Select from map
(For advanced users only)

Allows you to select any starting point for your route.

After the route is calculated, the route summary is displayed. It shows information about distance and time left to finish, estimated time of arrival and the method used (Fastest, Economic, Shortest, Pedestrian, Bicycle).

IMPORTANT: By default, the method of calculation is set to “Fastest”. To use a different method, see Advanced preferences.
Getting directions

The calculated route is displayed on the screen as a blue line.

The main navigation screen is providing not only map preview, but also well arranged additional information:

1. Next change of direction at crossing
2. Distance to next change of direction
3. Current street
4. Distance to destination
5. GPS signal strength
6. Current velocity
7. Estimated time of arrival at destination
8. Current city
9. Lane Assistant
10. Direction to destination
11. Next street to take
12. Map zoom
Acquiring GPS Position

In case there is no GPS signal, the screen becomes grey. This can happen under following conditions:

- the device is in a place, where the signal reception from satellites is obstructed by buildings, trees, cables or in a tunnel
- Sygic Mobile Maps settings are set incorrectly
- Device system settings are set incorrectly

Information about signal strength at the bottom of the screen provides extra information:

If the bars or port name is red, re-check the GPS settings (see Installation Manual).

If the bars are grey, stand outside with the good visibility of the sky until the signal is regained and the bars become green. Tap signal bars or select **Main menu > GPS Status** to see more detailed GPS information.

After the GPS signal is regained, your driving instructions will be displayed.
II. Planning Your Route

Navigating to Points of Interest

If you need to drive to a gas station, restaurant, hotel, or any other point of interest, enter the **Main menu**, select **Navigate to...** and then **Point of Interest**.

Next, define the area of searching:

- **Near my position**
  - Finds POI around you

- **Near address...**
  - Finds POI near the address that you specify

- **Near destination**
  - Finds POI near the destination of your current trip

- **In City...**
  - Finds POI in the city you select
How to find a point of interest:

Select a Group (e.g. Sports) and then select the POI type (e.g. Golf Course).

If you don’t know the group, use **Show All** button to get a list of all POI types.

If you don’t know the POI type, use **Any** button and just enter the name.

You can refine the results by typing a name of the POI. It’s not necessary to enter full name – you can just enter a part of it.

**NOTE:** Distance shown in the list, is relative to the Area that you specified in previous step.
Navigating Home

First, set your home location:

Main menu > 🌟 Settings > 🏡 Set home location, and enter your home address.

Once your home address is recorded, you can navigate home by simply selecting Main menu > 🏡 Navigate to... > 🏡 Home.

Navigating to Your Most Recent Locations

Once you have navigated to a destination, Sygic Mobile Maps makes it easy to return to the same location. There are several ways of reusing the previously selected destinations.

History

Sygic Mobile Maps keeps track of your most recent destinations. It is easy to reuse them again.

Just enter the Main menu > 🏡 Navigate to... > 📜 History and start the navigation by selecting your previous destination.
NOTE: Destinations are added automatically to the list, but if you want to quickly store your current position for future use, just select **Memorize position** from **Main menu**. Memorized position will appear in the list with 🔍 icon.
How to add a favorite location

A Quick Menu (tap information panel on the main screen, or press right button) > Add to favourites

B Main menu > ➩ Browse map > Select point on map > ✗ > Add as POI > Favourites

C Store your position during navigation (Main menu > ➩ Memorize position). Then go to Main menu > ➩ Manage POI > Add POI > ➩ History > Select memorized position (marked with ⬇️ icon)
Previous addresses

When entering an address through **Main menu** > ✧ Navigate to... > 📍 Address, the list of previously selected Countries / Cities / Streets appears, as you go through the address details. They are marked with 📅 icon.

Other icons that you can see during address search:
- City
- Capital city
- City center
- Street
- Street crossing
III. Changing the Route

Route Details

You can check the calculated route before you start driving. Enter **Main menu > 🏠 Route menu.**

Choose **Show route summary > Details** to get a detailed overview about the route.

The blue highlighted buttons indicate that specific type of road was used.
To avoid it, tap the blue highlighted button. For non-touchscreen devices, press the Up arrow.

**Modifying the Route**

If you need to make modifications to the existing route, enter the **Main menu** > 🚨 **Alternative route**.

You can 🔄 **Compute alternative route** in case you don’t like the route calculated on the first time.

In case the road ahead of you is closed, you can 🚫 **Avoid next**... few kilometers, to calculate a detour.

If you wish to travel through a certain place on your trip, you can set the 🛵 **Travel via**... and add a waypoint the same way, as setting the destination in **previous chapters**.

If you want to cancel your modifications of the route, use the 🛡 **Reset to original** route.
If you wish to cancel the calculated route completely, and use the navigation system only as an indicator of your current position, choose **Main menu > 🗺️ Route > ✗ Cancel route** function.

You can find additional information about modification of calculated route in the next chapter.

---

## Map Browsing Mode

Checking the details directly in the map, or even planning the route can be done in map browsing mode. Select **Main menu > 🗺️ Browse map** to start.

On touch screen devices, you can just drag the map to scroll it around. Use arrow buttons on non-touchscreen devices. To zoom the map in and out, use the
numeric keys, or keys # and * of your mobile device.

Available options for the map:

**Find...**
You can find a position by defining it the standard ways

**Show current position**

**Show entire route**

**Show city**
Shows entire city on map screen

**Show/Hide POIs...**
You can select, which types of POI types are displayed when browsing the map

You can select a place on the map and then enter the context menu for that point by pressing the button. Following actions are available:

**Navigate there** Sets the new destination. Original route will be deleted.

**Travel via** Adds a new waypoint to your existing route between start and finish.

**Continue** Adds a new waypoint after the existing destination.

**Add as POI** Stores the selected point to Favourites or other POI category.

**Find nearby POI** Searches for POIs that are around the selected point.
Avoid... You can select a radius around the point, which will be avoided in the route calculation. Existing route will be recalculated.

Itinerary planning

If you have added some waypoints to your route via Browse map or Alternative route, you can edit them in Itinerary. It is also possible to optimize waypoints within the route, plan a new route or store it for future use.

To edit the current route, open Main menu > Itinerary and select the [Current route] to see the list of waypoints.
You can see the starting point ⏯, the numbered waypoints and the finish ⛰. The places that you already visited are grayed out.

You can add a waypoint to the itinerary by clicking the + button.

Waypoint options

If you click any waypoint of the itinerary, you get the following options:

- **Set as visited** Stops navigating to this waypoint and recalculates the route to the following one

- **Set as finish point** Puts the waypoint to the end and moves others upwards in the list

- **Set as via point** Changes the finish point to a normal waypoint

- **Set as start** Stores the waypoint as a start of the route

- **Add nearby POI** Use this option for example if you have entered a destination of your business trip, and you want to find a nearby hotel.
Move up the selected waypoint in the list.

Move down the selected waypoint in the list.

Delete the waypoint.

Itinerary options
The following actions can be performed with each itinerary (available through the Options menu):

Optimize itinerary Optimizes the waypoint sequence

Save itinerary for future use

Delete itinerary
To change the factory settings, go to **Main menu** and select **Settings** icon.

**NOTE:** Buttons are displaying the situation that will occur when you push them, not the current status. E.g.: Button ☐ means that voice output and sounds are currently enabled. Pushing this button will disable the sounds.

- Set to 2D (flat) view
- Set 2D North Up
- Set 3D view
- Set automatic colours
- Set night colours
- Set daylight colours
- Disable sounds
- Enable sounds
- **Volume settings:**
  Set the sound intensity separately for low driving speed and for high speeds.

- Advanced settings:
  (for advanced users only)
  For more information, see the next chapter.

- **Planning preferences:**
  Set the routing algorithm:
  Fastest, Economic, Shortest, Pedestrian, Bicycle

- **Toll charge settings:**
  Set the preference of paid road segments: avoid them, don’t avoid them, or always ask.
GPS hardware: Detailed configuration of GPS and TMC hardware.

Signpost settings: Sets the number of signpost tables displayed at one time and the level of detail (Full, Simplified, Single line).

<table>
<thead>
<tr>
<th>Preferred</th>
<th>Other</th>
</tr>
</thead>
</table>

Rotate display: * Change the display orientation (landscape / portrait).

Keyboard settings: * You can switch between preferred keyboard layouts using button, that is available in every keyboard.

Regional settings: Set kilometers / miles, time format and format of GPS coordinates.

Set language (user interface)
Set voice (language of voice instructions)

Switch map: Load different map material from your device.

Set home location
